Sergio Benvenuto

Introduction to the Italian Edition of Glyn Daly, Conversations with Žižek

Summary:

Žižek's great merit lies in his having recognized that Lacanian thought should be interpreted as a derivation of Hegelianism, which has dominated part of French philosophy since the 1930s. This introduction to Žižek's work allows the author to highlight the essential nodes of Lacanian thought, and in particular the notion of the Real. He discusses in particular the dual interpretation – Kantian and Hegelian – of the concept of the Real, and the ethical and political consequences which these two interpretations somehow imply.
